CRYPTOGAMIC SOCIETY

OF

SCOTLAND.

THIRTY-FIRST

ANNUAL CONFERENCE.

PITLOCHRY.

1906.

EDINBURGH:

PRINTED BY JAMES SKINNER & CO., 27 THISTLE STREET.

Cryptogamic Society of Scotland.

THE THIRTY-FIRST ANNUAL CONFERENCE of the SOCIETY was held at Pitlochry on the 25th September 1906 and two following days. The place of meeting was Robertson's Pitlochry Hydropathic. Fifteen members were present, and fungi were found to be fairly abundant. On the first day an excursion was made to Bonskeid, on the second to Lude and part of Glen Tilt, and on the third to Faskally. The Society recorded an expression of their gratitude to the Proprietors of these Estates for leave granted to visit them. Favourable weather and the beauty of the scenery added greatly to the pleasure of the meeting.

The Business Meeting of the Society was held on the evening of the 26th. The Conference for 1907 was appointed to be held at Inveraray on a suitable date to be fixed by the Secretary. No appointment of President was made in the meantime. Mr. R. B. Johnstone was appointed Vice-President, the Hon. Secretary and Hon. Treasurer were re-elected, and the following were chosen as Councillors:—Colonel Harington-Stuart of Torrance, Dr. A. W. Borthwick, Dr. Wm. Watson, Miss M. L. Miles, Messrs. D. A. Boyd, J. R. Macgregor and J. A. Remison.

In the following Lists of Fungi the Hymenomycetes are reported by Mr. R. B. Johnstone, and include a few species found by himself on Kinnoull Hill, and by Mr. Carleton Rea at Killin,

previous to the meeting. The remaining fungi are reported by Mr. D. A. Boyd, and his list incorporates twenty-four species of Mycetozoa reported by Mr. W. B. Allen, and further authenticated, in the case of all but the commonest species, by Mr. Arthur Lister, F.L.S. The Mosses are reported by Mr. John R. Lee. Localities are indicated by the numerals placed after the species.

LIST OF FUNGI I.

LOCALITIES.

1. KILLIN. 2. KINNOULL HILL. 3. PITLOCHRY. 4. BONSKELD.
5. LUDE AND GLEN TILT. 6. FASKALLY.

**Amanita**—

phalloides, Fr. 5
muscaria, Linn. 4, 5, 6
pantherina, D.C. 6

rubescens, Pers. 4, 5, 6
